### **DETAILED ACTION**

This action is in response to the Appeal Brief filed on 2 March 2004 in which claims 1-18 are pending. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is vacated.

#### ***Response to Arguments***

In view of the appeal brief filed on 2 March 2004, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2643

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 5-6, 9-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Robinson et al (U.S. Patent No. 6,678,386).

Regarding claims 1, 5-6, and 9-10, Robinson teaches a modular assembly for a hearing instrument comprising: a faceplate (10), a battery door (101) in the faceplate; and an electrical programming contact assembly (200-220, 300-340; fig. 2-4) partially affixed to the faceplate and generally adjacent and conforming to the battery door.

Regarding claim 2, Robinson teaches the faceplate comprises a generally rectangular opening; and a battery door resides within the generally rectangular opening (fig. 1).

#### ***Allowable Subject Matter***

Claims 3-4, 7-8, and 11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
